I knew I wanted to act and I knew that I wanted to make movies. My first job was working as a temp for a Giant Screen/Imax Theater development company. It was there that I met my future producing partner. An incredible opportunity arose and we produced our first film, NSYNC Bigger Than Live, an IMAX/Giant Screen concert film. This led to the formation of my production company, Nelson Madison Films, where I write, direct, edit, and act.

Shortly afterwards I began studying acting at Playhouse West, a prestigious acting studio founded by Jeff Goldblum and Robert Carnegie. My acting teachers included Mark Pelligrino, Eric Edwards, Sean Barnes and Chris Liebe. Prominent alumni include James Franco, Scott Caan, Ashley Judd, and Mark Pelligrino.

My directorial debut was SHIFTED, a SAG feature length crime drama which played at film festivals. I played the lead role along side Jeris Lee Poindexter, Jill Wagner, and Vanessa Johansson.

My latest feature film, DELIVERED recently debuted on iTunes, Amazon VOD, and Youtube Movies. This SAG film has received critical notice from the industry because of its innovative use of technology to produce a great story with a very efficient work flow. CNN film critic, Nick Nicholson says, "DELIVERED is a damn good film." "Michael Madison's performance was epic." "Madison is very believable in his role and will make you root for him along the way." "I was simply amazed by the story arcs." The film won Special Jury Award at Worldfest.

This past summer, I directed, edited and acted in six national commercials for VEHIX.com

Indie Rights, the distribution arm of Nelson Madison Films is quickly becoming recognized as a leader in digital distribution. Our library of films can be found on iTunes, Amazon, Hulu, Vudu, Playstation, SnagFilms, and YouTube Movie Rentals.

While I enjoy writing, directing and editing, my passion is to become a leading actor.
